WM. PITB BALDWIN, M.D.
REPORT OF PRUDENTIAL COMMITTEE.

The Prudential Committee of Grace Hospital Society, in presenting their twenty-second annual report, find themselves relieved from the necessity of making it voluminous because of the complete reports of the Secretary, Treasurer and Superintendent. They will, however, call attention briefly to some points which come directly under their supervision.

The last two years may be regarded as epoch-making years for this institution. Not only have they marked the completion of the Munsill Maternity Ward with tunnel connecting with the kitchen of the main building, but there has also been installed a complete laundry, equipped with the latest and best working machinery, securing the most satisfactory results.

During the year 1911 the Society has acquired the land and building at No. 214 Orchard Street, formerly belonging to Mr. L. A. Bettscher. The lot has a frontage of 123 1/2 feet on Orchard Street by 205 feet deep, connecting with our lot in the rear, giving us a width of about 480 feet. The old barn has been removed and in its place will be a grass plat that will give about 2350 square feet of additional lawn.

The new purchase contains a large roomy house, which may be used in the near future for hospital purposes.

A driveway, ten feet wide, has been built from Orchard Street connecting with the driveway from Chapel Street. There is a commodious stable on the newly acquired property of sufficient capacity for all our needs.

The cost of this property was $11,000 and the cost of constructing driveway, repairs and remodeling house will be about $2,000 additional, making a total cost of $13,000.

The Orchard Street property and the improvements now being made will be paid for out of the funds received from the Col. Addis estate.

All of the buildings belonging to the Hospital property are in excellent condition outside and inside. The grounds have
been improved during the past year and further improvements are planned for the coming spring.
The Treasurer's report will show that our finances are in a healthy condition. The securities we hold are of a high grade and bring in a fair income.

We need a larger endowment fund to enable us to increase our charitable work, for which we have always abundant opportunity.

The Munsill Maternity Ward has proven a great success and has been the means of rendering aid and comfort to a large number of women. Mrs. Munsill, the generous donor, has continued her interest in that department by contributions for improvements and new equipment.

It is with deepest regret that we announce the death of this most generous benefactress, which occurred yesterday at her home in Hartford. We recommend that suitable resolutions on her death be drafted and a copy be sent to the family of our deceased friend.

Grace Hospital Society now owns property consisting of land, buildings and equipment representing a cost of $150,000, free from incumbrances of any kind. It has an endowment fund of $135,567.50, a contingent fund of $2,388.75, a general fund of $5,704.31 and a building fund of $81,869.38.

Because of the materially increased cost of carrying on our work we need more assistance from the public to maintain the high standard we have attained in caring for our patients.

The Training School for Nurses deserves especial mention. It is now nearly eighteen years since its organization. Its graduates are fully equal to those of any similar institutions and the school is being conducted in accordance with the best approved methods of educating its pupils to become faithful and efficient nurses.

Our Superintendent has proved herself capable of managing the affairs of her department in a most satisfactory manner.

To the Medical and Surgical Staff this Society is indebted for their loyal and self-sacrificing work, much of which has been done without any compensation, they giving freely of their time and services to ward and charity patients.

The Women's Board, which has done so much for the Hospital ever since it first opened its doors to admit patients, continues its good work, always responding promptly and generously to all calls for aid in carrying out any new project for the benefit of the Hospital.

To the efforts of this Board we owe the furnishing of the Nurses' Dormitory, the Maternity Ward and many private rooms in the main building.

These ladies raised the sum of five thousand dollars toward the support of a free bed, and we are constantly under obligation to them for their assistance.

We believe that the Hospital was never in as good condition or as well equipped to carry forward the work for which it was organized as it is to-day, and we can look forward with confidence that it will continue to increase its usefulness as time goes on.

We would call the attention of the members of the Society to the loss of membership by death and by expiration of five and ten year terms which have not been renewed. We ask that every member help us to secure new members and especially life members.

The cost of membership now established is as follows: five years, $10.00; ten years, $15.00; and life membership, $25.00. May we not hope for your cooperation in this matter?

The bequests for the year just closed have been small as compared with some previous years. Mrs. Mary A. Mallory bequeathed $4,000 toward support of a free bed; Mrs. Caroline Camp bequeathed $1,000 to the general fund, and Wilbur F. Gilbert a contingent bequest.

All of these estates are in the process of settlement in the Probate Court.

In speaking of the Munsill Maternity Ward, we should have stated that double its present capacity is needed to care for applicants for admission, and we therefore hope to interest
friends of the Hospital sufficiently to provide the necessary funds for additional accommodations, including an electric elevator, which is greatly needed. The estimated cost of building an addition and installing an elevator is $15,000 and for furnishing the same $2,000, making a total of $17,000.

The hearty cooperation of the Board of Directors has rendered our arduous duties pleasant, and we shall commence the new year with the assurance that we have their earnest support as well as that of the faculty and employees.

The resolutions passed at the annual meeting of the Society on the death of Mrs. Munson will be found in the Secretary's report.

Edwin S. Geeley,
Myron R. Durham,
Wm. Pitt Baldwin, M.D.,

REPORT OF THE SUPERINTENDENT.

To the Grace Hospital Society:

The twenty-first annual report of the Superintendent for the year ending December 31, 1911, is herewith respectfully submitted. Nine hundred and seventy-three persons have received treatment from the hospital during the year. There were 14 private patients and 10 ward patients remaining at the close of the year, December 31, 1910. During the past year 868 have been admitted—273 in private rooms, 595 in wards—146 of whom were sent by the Board of Charities. Fifty-one came in case of slight injuries and did not have to remain in hospital. There were 257 patients more admitted than during the previous year, the daily average being 53. The average cost per week was $11.61. There were 294 weeks' care of patients for which the hospital received no payments whatever. The ambulance made 173 calls.

In the spring, a new system of bookkeeping was established which has proven most satisfactory. Also, a new switchboard was installed, connecting the various departments of the hospital by telephone. We feel the event of the year to be the splendidly equipped laundry—a long-felt want which has proven to be all we expected—a perfect success in every way. The grounds, which have always been one of the most attractive features, have been enlarged and improved by the removal of the barn, the planting of hedges, and the laying out of new drives, etc. A new entrance, opened from Orchard Street, makes it more convenient for vehicles entering from that direction.

The work of the year has been going on in its quiet way without unusual occurrence. The number of pupils in the training school has been increased to thirty-three. The increase is not only due to a greater number of patients but that the course may include three months in the Ophthalmic Hospital, New York, in order that the nurse may prove a more valuable assistant to the physician in eye and ear work. Each nurse has two months' service in social settlement work under the supervision of the head nurse of that department, where they not only nurse the sick poor but teach them something of sanitation and hygiene, that they may know better how to care for themselves. Since the enlargement of the Training School we have not only given better care to patients in general but have been able to supply special nurses when needed; the earnings in less than six months amounting to over one thousand dollars.

There has been no serious illness among the nurses. However, I wish to thank Dr. Walter C. Skiff and Dr. W. P. Lang for their kind and courteous attention when needed. The Hyperion Theatre has frequently sent tickets for theatre parties which have been appreciated and enjoyed.

While we feel the past year has been towards success, we are not satisfied. There is much ahead of us to do, many improvements to make. We are outgrowing our buildings, especially the maternity department, and hope in our next annual report to tell you of much more accomplished.

I take pleasure in testifying to the loyal and efficient assistance of my associates in the work, the Prudential Committee, Staff and Ladies' Aid. I want to thank you for all you have permitted me to accomplish and enjoy.

Respectfully,

Marian Little,
Superintendent.

RULES FOR VISITORS.

To the Wards of the Hospital, visitors will be admitted every day of the week from 1 to 3 P. M.

No ward patient will be allowed more than two visitors at any one time.

Visitors may see patients in the Private Rooms daily, subject to the discretion of the physician in attendance.

Visitors are requested to time their calls between 1 and 3 P. M. if possible.

Articles intended for patients must not be taken to the rooms or wards, but left at the office with the Superintendent of Nurses, who will see to the proper distribution of all packages.

Confections of all kinds, highly seasoned articles of food and cake, are strictly prohibited, and must not be brought to the Hospital.

Visitors of Nurses should first inquire for the Superintendent of Nurses, who shall see that no neglect of duty arises from such visits.

Visitors who wish to inspect the Hospital should inquire for the Superintendent, who will detail some one to show them about.

No visitor shall be allowed to lodge at the Hospital, except by permission of the Prudential Committee.

The Grace Hospital Society of New Haven, having been authorized by the General Assembly of the State of Connecticut to maintain a Training School for Nurses, makes the following Rules and Regulations for the observance and guidance of those entering and attending the School.

An applicant for admission to the School must be in sound physical condition, and furnish evidence of having had a high school education, or its equivalent.

She should enclose with her letter of application a letter from a reliable citizen testifying to her moral character and disposition, and one from a physician regarding her health. She must have no hereditary tendency to pulmonary troubles or constitutional diseases and must be free from the necessity of nursing members of her family during the three years' course, except in extreme illness.

Applicants may be received at any time during the year that vacancies may occur.

If acceptable as a candidate, she will enter upon a term of two months' probation, during which board and lodging will be furnished, but she will receive no compensation. Acceptance as a pupil nurse will depend upon the efficiency shown during probation.

If considered satisfactory, she will be required to remain three years in the Training School, to obey the rules and regulations of the Hospital, and to perform any duty assigned...
to her. She will receive Five dollars ($5.00) per month during first year, Six dollars ($6.00) per month during second year, and Seven dollars ($7.00) per month during third year, and Thirty dollars ($30.00) at the expiration of the course.

This is not intended as wages, as it is considered that the education received is a full equivalent for services rendered, but is to cover necessary and incidental expenses.

During the months of probation, a neat blue wash dress with clerical linen collar must be worn, but after that time only the uniform of the School, which consists of a blue and white checked gingham, white apron with bib, cap and linen collar. Candidates should bring the following articles: six white aprons, the band of which should be fastened with three pearl studs and with a 4-inch hem reaching within 1 inch of the bottom of the dress; two bags for soiled clothes, a napkin ring, a good supply of plain clothing marked on bands with name in full, two pairs of comfortable shoes with low rubber heels, and suitable outer garments for all kinds of weather.

The course of training includes instruction by the attending physicians and surgeons at the bedsides of the patients; lectures by members of the Medical Board upon anatomy, physiology, medical, surgical, gynecological and obstetrical nursing, emergencies, hygiene, dietetics, massage and special subjects; instruction by Superintendent of Nurses from manuals and text-books and in the wards, in the general care of the sick, bed making, changing of the bed and bed linen, management of helpless patients, giving baths in bed, dressing of wounds, burns, ulcers, etc., the prevention and dressing of bed sores, the application of fomentations and poultices; the use of hot water bottles, the use of catheter, the administration of enemata and the ventilation of wards and rooms. Practical instruction in obstetrical nursing will be given in the maternity ward. There will also be a course in cooking for the sick, and the serving of food and delicacies in a proper manner.

During the senior year pupils will be assigned to such positions of responsibility as may be available, acting as head
nurses in order that they may be fitted to take charge in institutions.

The hours of duty for day nurses are from 7 A.M. to 7 P.M. for night nurses, from 7 P.M. to 7 A.M. Each nurse on day duty is allowed two hours a day for rest and recreation, one half day after 1 P.M. each week, and 4 hours on Sunday. The School is non-sectarian but pupils are expected to attend religious service once on Sunday. Three weeks vacation is allotted each year when a nurse can best be spared.

The hours for rest and recreation may be changed or withheld at any time the interests of the Hospital may demand it.

Time lost in sickness must be made up before a diploma will be given. At the end of three years, after satisfactorily passing the necessary examinations, the nurse will receive a diploma and be entitled to wear the badge of the School.

The Training School is a department of the Hospital, and is controlled by the Prudential Committee. The Superintendent has immediate supervision of the course of instruction and of the duties and discipline of the nurses in the wards.

GRADUATES OF THE TRAINING SCHOOL.

1897.
Miss Malvina Coolidge (Mrs. George Evans).
Mrs. Julia R. Hamm. Deceased.
Miss Katherine Stuecky (Mrs. George Rosbee).

1898.
Miss Alice J. Keeler, Hartford, Conn. Private nursing.

1899.

Secretary.
MRS. SHERMAN F. FOOTE.

Purchasing Committee.
MRS. SHERMAN F. FOOTE.
MRS. WARNER D. JUDSON.

Auditor.
MR. SHERMAN F. FOOTE.
ANNUAL REPORT OF WOMAN'S BOARD.

In reviewing the year 1911 we find the Woman's Board still active in well-doing.

In January Mrs. Sargent gave the annual whist for the benefit of Our Free Bed Fund.

In February thirty dozen napkins were provided, and in March five dozen sheets were given to meet the needs of the Hospital.

The Annual Donation Day was held on June 14th and as the day was stormy, we feared we might be neglected, still many responded by gifts of money and useful articles.

On resuming our work in the fall, we provided a sewing machine for use in the hospital sewing room, also twelve dozen sheets were purchased for general use.

We wish to thank the Needlework Guild, the Hospital Aid Society and the United Workers for their gifts, also those who so generously have sent in flowers and magazines, and especially the daily papers for the notices they have so kindly given us.

In conclusion, let us hope that the year 1912 will be a prosperous one for the work of the Woman's Board.

Respectfully submitted,

R. M. CURTIS,
Secretary.
## TREASURER'S REPORT.

*Mrs. E. J. Walker,* in account with *The Woman's Board of Grace Hospital.*
