## JOURNAL OF MARINE RESEARCH

The *Journal of Marine Research*, one of the oldest journals in American marine science, published important peer-reviewed original research on a broad array of topics in physical, biological, and chemical oceanography vital to the academic oceanographic community in the long and rich tradition of the Sears Foundation for Marine Research at Yale University.

An archive of all issues from 1937 to 2021 (Volume 1–79) are available through EliScholar, a digital platform for scholarly publishing provided by Yale University Library at <https://elischolar.library.yale.edu/>.

## **Editorial:**

With the completion of Volume 67 of the *Journal of Marine Research*, George Veronis is stepping down after having served as editor for 37 years. In the Journal's 73-year history, there have been only three editors, and George has served the longest. During George's tenure, the Journal has prospered and it has strengthened its position as one of the best oceanographic scholarly Journals. The entire oceanographic community should be grateful for George's commitment to excellence, hard work and commitment. His accomplishments with the Journal are most impressive.

Needless to say, I am humbled at being asked to serve as the next editor of the *Journal of Marine Research*. I can only say that I will do my best to assure the Journal's health and continued excellence.

One constant throughout the Journal's history has been support from Yale University's Sears Foundation for Marine Research. Their sustained support made the Journal possible, and it continues to keep subscription costs down and page charges at zero. The Foundation's support is a true service to the community.

The coming years will undoubtedly bring change to the Journal as well as to scientific publishing in general. Making these changes may require letting go of some cherished traditions, and it may require new approaches altogether. I will view these changes as an opportunity for improvement. The one constant I promise is a sustained commitment to the Journal's high publication standards.
