## Global Structured Products

### Why Invest in Structured Finance Securities and Leveraged Loans?

Structured Finance Securities (including ABS, RMBS and CMBS) have historically exhibited lower default rates, higher recovery upon default and better rating stability than comparably rated corporate bonds. Consequently, CDOs consisting of Structured Finance Securities have outperformed other CDO types.

- According to a recent Moody's study, the long-term historical average (1983-2003) of unchanged ratings of Structured Finance Securities and CDOs was 92.3%, which compares favorably to the 76.6% average of unchanged ratings of corporate bonds for the same period.<sup>(4)</sup>
- Structured Finance Securities have historically had an average recovery rate higher than that of corporate bonds.<sup>(5)(6)</sup>

The leveraged loan market is a large market with average annual issuance of over \$170 billion over the past 5 years<sup>(7)</sup>. Loans possess inherent structural and credit protections including, capital structure seniority, that make them well suited to supporting moderate leverage.

- Loans possess certain long-term characteristics such as risk adjusted returns, low volatility, low total return correlation with other assets, and high recovery rates, with an average recovery of 85% from 1987 to 2004<sup>(7)</sup>.

(7) S&P/MD Leveraged Lending 3Q 2004. Industry breakout as of 9/24/04. Comprises all loans, including those not tracked in the LSTA/LPC mark-to-market service. Vast majority are institutional tranches. S&P "U.S. LossStats Database", last updated Feb 2004, contains 2,365 defaulted loans and bonds that defaulted between 1987 - Feb 2004.
